

It's not as close as it looks !

(But it's a CLASSIC photo none-the-less)

This photo is a tremendous example of how a telephoto lens can fore-shorten the subject in such a way that the action looks to be much closer together than is really is, and much closer to the camera. This Eva Air Boeing 747 is seen taking off from runway 36L at Amsterdam's Schiphol Airport. Notice the wake turbulence behind.
